Press Release

Comcores has become an Analog Devices Associate Alliances Partner

Copenhagen, Denmark, Sep 13, 2016 – Denmark Headquartered Comcores ApS, a specialized supplier of silicon intellectual property (SIP) has today become an Analog Devices Associate Alliances Partner.

As a leading provider of among others JESD204B IP-cores, Comcores tight integration with Analog Devices converter and front-end solutions enable easy bring up of new product designs making use of this interface method. Comcores contribute to this alliance by performing interoperability tests between standard FPGA development platforms and Analog Devices products enabling fast prototyping and proven support for supported configurations with the availability of reference designs

“Short-cutting the effort spend bringing up new converter and front-end solutions and testing these are welcomed by any vendor”, said Thomas Noergaard, Founder of Comcores. “The availability of reference designs with solid documentation saves weeks of works enabling time saving in any project”.

About Comcores

Comcores is a leading provider of silicon agnostic IP-cores for communication systems. State of the art know how and practical experience enabling connectivity in communication systems are key elements in Comcores’s delivery of unique, high quality, production-proven IP-cores. Comcores solutions not only accelerate development and cut costs, they increase overall design reliability and project predictability.
